New Navbar

Where everything sits now

- Six menus: League, Players, Insights, Tools, Minigames, NBA
- Trends, Projections and Analytics live under Insights
- Search sits on the right — or hit Ctrl + K

The screenshot displays the Fantasy League website interface. The new navbar at the top includes links for League, Players, Insights (highlighted), Tools, Minigames, and NBA. A search bar with a magnifying glass icon and the text 'Search...' is on the right, with a 'Ctrl K' shortcut. Below the navbar, the 'Projections' page is active, showing 'Live model projections for tonight's games.' A dropdown menu for 'Insights' is open, listing 'League Analytics', 'Player Trends', 'Projections' (selected), 'Standings Estimator', and 'Feature Store'. The main content area features a search bar for players, filters for 'All NBA Teams' and 'All Fantasy Teams', and a 'Slate' section showing 'Upcoming (live) — 2026-11-25' with a checked 'Integer projections' option. A table of player projections is displayed below.
